PROFESSIONAL SUMMARY

Game Developer with professional experience building production-level web-based games and interactive systems. Specialized in gameplay programming, real-time rendering, and performance optimization using TypeScript, Phaser, and Unity. Experienced in handling complex game logic, animation pipelines, and backend-driven systems in live environments. Strong problem-solving skills with a focus on delivering smooth, scalable, and engaging player experiences.

CAREER HISTORY

GAME / SOFTWARE DEVELOPER (FREELANCE)

- ***SELF-EMPLOYED | 2019 - PRESENT***

1. Designed and developed interactive applications, games, and web systems using C#, Unity, and modern web technologies
2. Built scalable architectures with focus on performance, clean code, and maintainability
3. Delivered end-to-end solutions from concept to deployment across multiple projects
4. Continuously improved development workflows through automation and AI-assisted tools

SOFTWARE DEVELOPER

Jan 2025 - March 2025

- ***NORDIC HEEL UNLIMITED***

1. Developed and maintained internal business systems using PHP, MySQL, and JavaScript in a live production environment.
2. Designed database structures and implemented server-side logic to optimize company workflows.
3. Contributed to dynamic user interfaces and improved system performance through bug fixes and feature enhancements.
4. Participated in testing, deployment, and documentation processes to ensure smooth system operations.

MID-LEVEL GAME DEVELOPER (REGULARIZED)

- ***FYB TECHNOLOGIES INC. – BONIFACIO GLOBAL CITY | 2025 – 2026***

1. Developed and maintained production-level web-based casino/slot games using TypeScript and Phaser
2. Engineered gameplay systems, UI flows, and animation pipelines driven by backend game logic
3. Optimized rendering, asset handling, and game performance for real-time user experience
4. Debugged and resolved complex issues across gameplay, UI, and system interactions
5. Collaborated closely with QA and designers to deliver stable and polished releases
6. Maintained and extended existing large-scale codebases under active development
7. Utilized AI-assisted tools to accelerate development, debugging, and refactoring workflows

CORE SKILLS

- **Programming & Software Engineering:** C#, TypeScript, JavaScript, SQL, OOP, Data Structures & Algorithms, API Development, System Design
- **Game Development:** Unity, Phaser, Shader Graph, Real-Time Rendering, Gameplay Systems, Performance Optimization
- **Web & Full-Stack Development:** Frontend Systems, UI/UX Implementation, Backend Logic, Database Design, REST APIs
- **AI-Assisted Development & Automation:** AI Tools (ChatGPT, Claude, Codex, Grok, Code Assistants), Workflow Automation, Debugging Optimization, Rapid Prototyping

PROJECTS

- **INVENTORY MANAGEMENT SYSTEM**

1. *Developed a full-stack system using PHP & MySQL with authentication, CRUD, and reporting modules*
2. *Designed relational database structure and optimized queries for performance*
3. *Implemented responsive UI and improved usability for business workflows*

- **PORTFOLIO WEBSITE**

1. *Created a personal site to showcase projects using HTML, CSS, and JavaScript*
2. *Responsive across mobile and desktop*

- **UNITY GAME PROJECT**

1. *Built a stylized 2D/3D game featuring custom shaders, gameplay systems, and scoring logic*
2. *Implemented animation systems and visual effects using C# and Shader Graph*
3. *Focused on performance optimization and real-time rendering techniques*
